Why Sex? • The Red Queen Theory - "It takes all the running you can do, to keep in the same place" Red Queen - 'Alice in Wonderland' • Parasite-host interactions - Sexual reproduction persists because it enables species to rapidly evolve new genetic defenses against parasites • Guppy and snail species exhibit sexual reproduction

Another form of epistasis is based on Red Queen coevolution (Bell, 1982) and one particular form of the Red Queen hypothesis postulates that the

main selective force maintaining sex is protection against parasites and pathogens (Hamilton, 1980; Seger and Hamilton, 1988) Population genetic analysis of this model has shown that the epistasis
